2

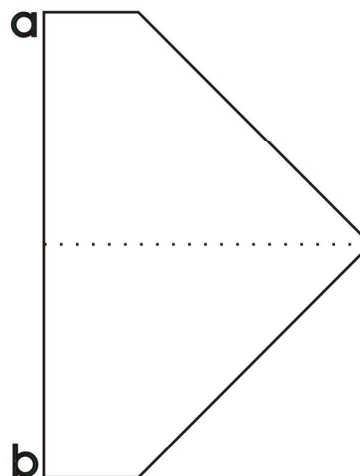

Atrodam vidu, pielokām stūrus.

3

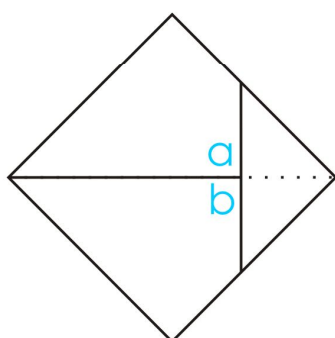

4

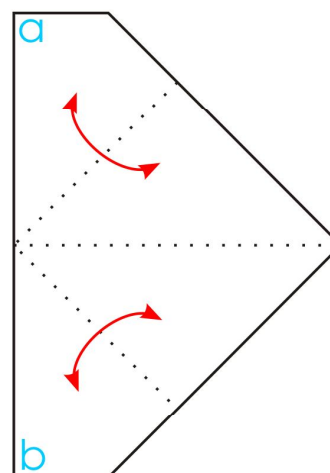

Spicos galus salokām kopā.

5

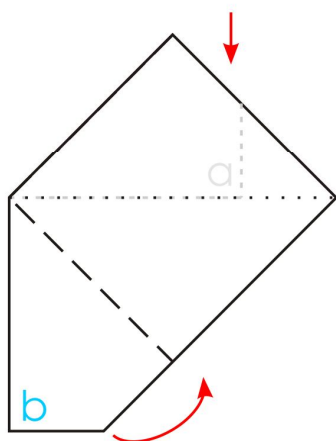

6

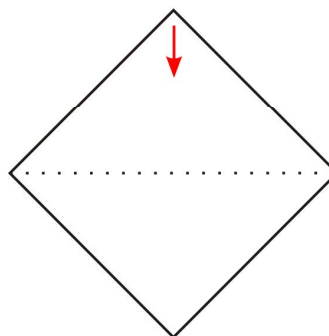

Salokām a un b galus pret vidu (kā 5.att.) un atlokām atpakaļ (kā 6.att.).

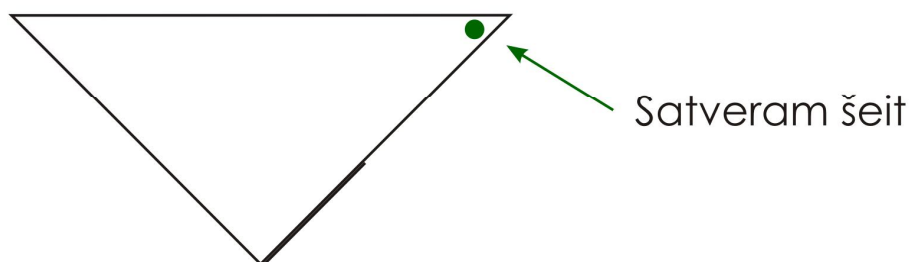

7

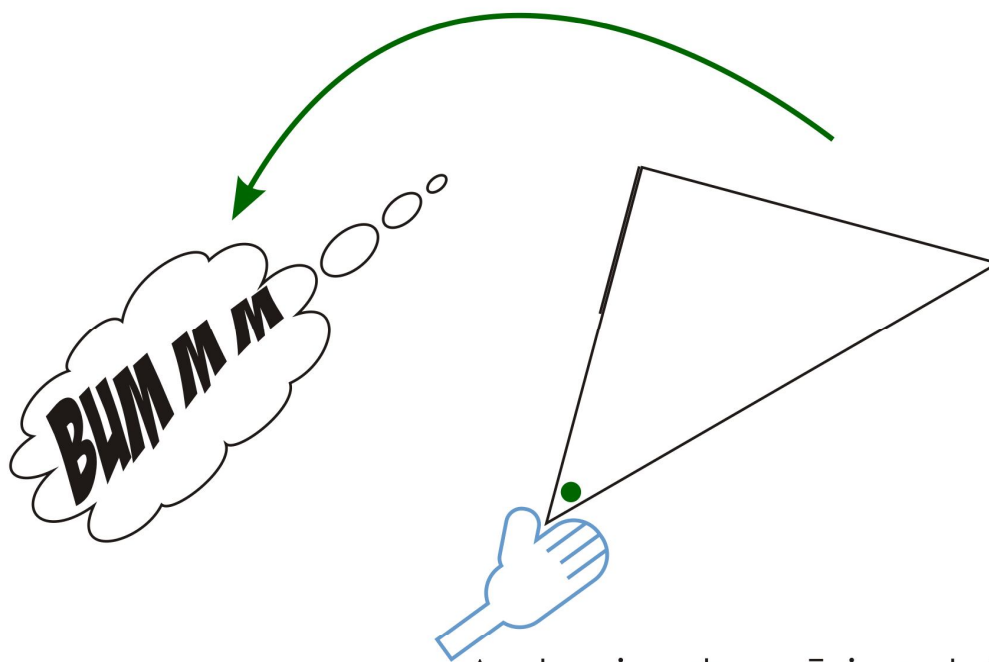

8

Ielokām a un b stūrus iekšā, pārlokām pa ielocīto līniju stūrus kopā (8.att.).

Jāizskatās pēc šāda trīsstūra.

Ar strauju rokas vēzienu taisam blīkšķi!
